DERMA CSM-ICH

Derma CSM-ICH is a chrome containing synthetic retanning agent for all kinds of leather.

CHARACTERISTIC

Appearance	Green powder
Ionic Structure	Anionic
pH:	3.4 +/- 1.0

PROPERTIES

- DERMA CSM-ICH is a synthetic organic- chrome condensation product.
- DERMA CSM-ICH is synthetic retanning agent which, compared to chrome salts, renders the leather with more softness as well as a fine and smooth grain.
- DERMA CSM-ICH improves dyeability, brilliance and shade intensity.
- DERMA CSM-ICH does not modify the character of leather tanned with chromium.
- DERMA CSM-ICH facilitates a more even dye, without modifying its intensity.

STORAGE

DERMA CSM-ICH has a Shelf-life more than 1 years when stored between suitable conditions (5-40 degrees Celsius) In original bags.

PACKAGING

Plastic drums of 60 and 120 kgs
