### DERMA H-DS

A synthetic fatliquor with excellent softening properties to furnish leather with very good light fastness and a waxy touch.

#### CHARACTERISTIC

---

<b>Chemical Constitution</b>	Alkyl phosphonic ester and aliphatic hydrocarbon of high molecular weight aliphatic hydrocarbons.
<b>Appearance</b>	Yellow to amber viscous liquid.
<b>pH</b>	Approx.7.0
<b>Ionic Character</b>	Anionic
<b>Stability</b>	Resistant to electrolytes in under work conditions not resistant to vegetable and resinic tannins.
<b>Dissolution</b>	Before adding to the flots dilute with warm water until obtaining fluid consistency.

#### ROPERTIES

---

- Very good light fastness
- Good Softness
- Very good dyeability
- Very good levelness
- Very good heat fastness
- Full Round and Fatty Fell
- Reduce water penetration
- Very good light and heat fastness

#### APPLICATIONS

---

Derma H-DS is mainly applied fatliquoring mixtures for all type of leather skins

#### REMARK

---

Derma H-DS is a product in emulsion , therefore its appearance (consistency and colour ) can vary. The technical properties of application of the product will not be affected.
