### DERMA MCC-I

**DERMA MCC-I is anon ionic emulsifier to stabilize fatliquor emulsions.**

#### CHARACTERISTIC

---

<b>Chemical Constitution</b>	Mixture of long chained fatty alcohol polyglycol ethers.
<b>Appearance</b>	Colorless-yellowish, clear-turbid, liquid.
<b>Ionic Structure</b>	Non-ionic
<b>Ph(10 %aquoussol.)</b>	6-8
<b>Solubility</b>	Can be dissolved undiluted or diluted with water
<b>Compatibility</b>	Compatible with anionic, non-ionic and cationic and fatliquor agents.
<b>Dissolution</b>	Can be mixed with water in any proportion.

#### PROPERTIES

---

- Very good emulsifier
- Increases stability
- Can be used together with mixed fatliquors
- Prevents precipitation when used for doubleface
- Improves penetration
- Increases softness

#### APPLICATIONS

---

**Derma MCC-I** is used together with fatliquors, in a ratio of ca.5% of total amount.

#### PACKAGING

---

Plastic drums of 60 and 120 kgs

---
