DERMA MO AST-H

CHARACTERISTIC

Appereance	Beige paste
Active matter	40% approx
Ph(10%sol.)	7 +/- 1
Solubility	With water 55 Derece 1:4
Shelf life	Up to months when properly stored
Special instruction	Stir well before any single use

PROPERTIES

***Derma MO AST-H** is a synthetic oil ideal for fatliquoring chrome leather, vegetable and combined tanned leather. It's very good electrolyte stability guarantees an optimum pre-fatliquoring in pickling, chrome tannage and retannage /neutralization, **improving tear strength.**

***Derma MO AST-H** is suggested for the production of any kind of leather where an optimum fatliquor dispersion is needed through the inside layers.

***Derma MO AST-H** used as a pre-fatliquor for skins improves fibres elasticity and helps a very uniform penetration and dispersion of other retanning agents.

APPLICATIONS

PACKAGING

Plastic drums of 60 and 120 kgs
