DERMA SOC-FGH

Blend of Specific Fillers

CHARACTERISTIC

Appereance	Ivory to light beige powder
Active matter	98 % +/- 2
Ph(10% sol.)	7+/- 1
Shelf life	Up to 12 months when properly stored.

PROPERTIES

* **Derma SOC-FGH** is a special product that has to be used during the re-tanning process in order to fill up empty and loose area of the leathers.

* **Derma SOC-FGH** can be easily dispersed within the empty fibers of the leather giving fullness and roundness enhancing the tightness and maintaining a very fine and clean grain.

* **Derma SOC-FGH** shall be added after neutralization, when the fibers are well open and are capable of absorbing the product properly, alone or in combination with other re-tanning material so to perform properly.

APPLICATIONS

PACKAGING

Plastic drums of 60 and 120 kgs
